

ULTRA LITE

Very easy-to-adapt and accept with the help of upgraded soft design.

UltraLite is a model of progressive developed to meet the needs of active wearers, for daily use.

Our Progressive UltraLite lens provides wide fields of vision, comfortable and light passages between areas and low level of peripheral disturbances.

UltraLite is very acceptable progressive due to immediate adaptation from the first experience and its soft design. It is an optimal solution for initial users, but also for experienced wearers who decide to change optical frames or model of progressives. It is designed to provide a constant optical quality for a long period, in sports activities, in use of digital devices, written media, in reading of small characters. Allows fast and dynamic focusing.

DRP
DISTANCE REFERENCE POINT
Reference point for far diopter measurement

FC
FITTING CROSS
Fitting cross position marks the pupil center position

NRP
NEAR REFERENCE POINT
Reference point for near diopter measurement

ADVANTAGES

- ✓ Wide vision fields and low aberrations.
- ✓ Ideal solution for new progressive users.
- ✓ Very easy-to-adapt and accept with the help of upgraded soft design.
