

INDOOR HD

Wide near zone for reading, using computer and indoor activities.

Indoor HD is a model of progressive lenses suitable for activities in interiors. It has a wide visual field for near distances and offers maximum comfort for work in close spaces.

Indoor HD is recommended as an optimal choice for office work, handicraft, reading and all indoor activities.

It is a type of progressive lens developed to increase the zone for near vision, with quite correct area for far vision. Thanks to an advanced design, the concentration of unwanted disturbances is reduced to a minimum and adaptation to these progressives is very easy.

DRP
DISTANCE REFERENCE POINT
Reference point for far diopter measurement

FC
FITTING CROSS
Fitting cross position marks the pupil center position
