

OPTIMA HD

Well rated by experienced PAL users

Optima HD is a progressive lens with a large application and a very easy adaptation. It is comfortable and pleasant even at first wearing, the best solution for everyday use.

This model is suitable for outdoors stay, drive, indoors work, for long reading hours or working on a computer. It provides exceptional optical performances with optimal visual acuity.

The **Optima HD** is characterized by perfect balance between far and near and allows dynamic vision which covers everyday life activities. **Optima HD** has a large zone for far distance and extended for middle distances. The astigmatic disturbances and the peripheral aberrations are reduced to allow an optimal comfort during all day use.

DRP DISTANCE REFERENCE POINT
Reference point for far diopter measurement

FC FITTING CROSS
Fitting cross position marks the pupil center position

NRP NEAR REFERENCE POINT
Reference point for near diopter measurement

VISUAL PROFILE

Width of visual field for far vision	★★★★☆
Width of visual field for intermediate vision	★★★★☆
Width of visual field for near vision	★★★★★

MHF'S

Minimum fitting height available in 16/18/20 mm

Our Progressive Optima HD design can be ordered with Individual parameters.

FITTING NOTE

Align the fitting cross at the pupil center. For an appropriate choice of diameter and minimum mounting height, the suitable centering charts should be used.

The Optima HD progressive design fits in many different models and frame styles.
